

DENTAL IMPLANT NURSING

Start Date: 9th, June 2023

End Date: 9th, June 2023

Cost: £265

Course Introduction

COURSE FULLY BOOKED. PLEASE CONTACT US IF YOU WOULD LIKE TO BE NOTIFIED WHEN OUR NEXT IMPLANT NURSING COURSE BECOMES AVAILABLE This 1 day course, will cover the essential knowledge and skills of dental implant nursing, as well as providing helpful tips and methods to make your working life simpler, and to help your dental implant treatments run more smoothly and efficiently. There will be a combination of lecture, hands-on practicals, and a LIVE dental implant surgery guided through from the nurse's perspective.

The course content will be relevant to all implant systems, but the course will be delivered using Neodent equipment and components, with the support of Quintess Denta, the exclusive Neodent distributor for Ireland.

Learning Objectives & Aims

The course will cover the following:

Essential knowledge-

- An introduction to dental implants
- Medical & social history, and contraindications to implant treatment
- Implant risks and benefits
- Conventional & immediate placement, and immediate loading
- Hands-on placement of a dental implant into bone blocks
- Types of grafting procedures, sinus lifts

Case planning-

- The importance of CBCT scans and planning with photography.
- Hands-on photography and scanning training
- Treatment plan letters
- Storage & organisation of the implant surgery
- Pre-operative appointments, sedation, and the need for physical assessment & baseline checks
- Digital implant planning for guided surgery

Patient management through implant treatment –

- Preparing a patient for implant treatment & building the implant nurse-patient relationship
- The nurse's role in the implant consultation
- Preparing your patient for surgery: post-operative instructions & what to expect post-operatively and in the healing process.
- Patient consent

Surgery day protocols –

- Surgical set-up and aseptic technique
- Check lists for implant therapy
- Surgical hand antisepsis
- Donning & surgery set-up (practical session)
- LIVE IMPLANT SURGERY – guided from the nurse's role in the procedure

Implant restoration –

- The steps of implant restoration
- Aftercare & long-term maintenance

Full arch implant therapy

- Overdentures
- Fixed bridge work
- Immediate full-arch loading

Speaker List

Adele Holland

My career in dentistry started in 2007, and I quickly developed a passion for the industry.

I have spent many years being lucky enough to work alongside some of the best clinicians in the UK, training and gaining knowledge in all areas and aspects of dentistry. Over the years I have developed my skill set and taken on the roles of treatment coordinator, head nurse, compliance manager and implant co ordinator, expanding specifically in implantology and surgical procedures. Later in my career I began leading courses for clinicians and nurses in implantology, specifically in asepsis, full arch and immediate loading and I now enjoy lecturing and training other nurses in all areas of implant and surgical dentistry.

I have gained post qualifications in radiography, intravenous sedation and dental implant nursing.
